

Supplementary Materials

Introduction

This file corresponds to the draft paper “Type-Safe Modular Parsing”.

GitHub Repo

Our GitHub repository: <https://github.com/hy-zhang/parser>

The above link is the root directory of our repo. There is a table for our case study.

To view our experimental code together with the case study source code, please click:

<https://github.com/hy-zhang/parser/tree/master/Scala/Parser/src>

Dependency

Our experiments are conducted with the Scala Packrat parsing library.

The original library GitHub repo: <https://github.com/scala/scala-parser-combinators>

We already have a copy of the exported jar file in our project, please click:

<https://github.com/hy-zhang/parser/tree/master/Scala/Parser/lib>
